Beyond Climate and Nature: Kanadevia Expands Sustainability Disclosure to People & Society

~ New Report References TISFD Framework Beta Version 0.1 ~

Kanadevia Corporation today published a sustainability disclosure report reflecting the concepts of the TISFD Framework Beta Version 0.1 (published in May 2026; hereinafter referred to as the "TISFD β Version"), an emerging disclosure framework for people- and society-related issues, alongside disclosures aligned with the recommendations of the TCFD and TNFD for climate- and nature-related issues. Through this report, we aim to communicate its evolving approach to sustainability to stakeholders in Japan and abroad, while further deepening stakeholder dialogue and engagement.

■ Key Highlights of the Report

- Disclosures incorporating the concepts of the TISFD β Version, in addition to the recommendations of the TCFD and TNFD
- Cross-cutting analysis of “dependencies, impacts, risks, and opportunities” related to climate, nature, and people & society
- Illustration of the value creation pathway linking the “2050 Sustainable Vision” and its key challenges, the “Seven Pillars of Success,” to the creation of environmental, social, and business values
- Published in both Japanese and English to enhance global accessibility

Full Report： Climate, Nature, People & Society Disclosure Report

Sustainability Challenges: From “Separate” to “Integrated” Approach

In recent years, companies have been expected to address a broader range of sustainability challenges, including not only climate change but also biodiversity

conservation, respect for human rights, and the development of responsible supply chains. These issues are closely interconnected. Addressing them in an integrated manner, rather than separately, can help mitigate business risks while creating new opportunities for growth. Against this backdrop, the report incorporates people & society perspectives in addition to climate and nature, providing a comprehensive analysis of “dependencies, impacts, risks, and opportunities.” The TISFD β Version is a framework designed to help organizations identify and disclose people-related impacts, dependencies, risks and opportunities, including those related to human rights, occupational health and safety, diversity, and relationships with local communities. Drawing on this framework, Kanadevia has analyzed the interactions between its business activities and people & society across the entire value chain and has incorporated the findings into its sustainability strategy and transition plans.

Backcasting from the 2050 Sustainable Vision: Value Creation Pathway

The Kanadevia Group’s 2050 Sustainable Vision is built around two core goals: “Realize zero environmental impact” and “Maximize people’s well-being.” To realize this vision, we have established the “Seven Pillars of Success” as our key strategic priorities. The sustainable and resilient society envisioned by the Kanadevia Group—"Resilience Eco Society®”—represents the future that lies beyond these efforts. This report sets out a clear pathway showing how challenges related to climate, nature, and people & society can be transformed into business opportunities and translated into environmental, social, and business value creation.

Kanadevia has been proactively enhancing its sustainability-related disclosures, having commenced disclosures aligned with the TCFD in 2021 and published its TNFD Report in 2024. Looking ahead, we will continue to elevate the quality and granularity of our reporting through stakeholder engagement, striving to closely align our sustainability efforts with the enhancement of medium- and long-term corporate value.

【Definitions】

■ The TCFD, TNFD, and TISFD are international initiatives that have developed, or are developing, frameworks and recommendations for sustainability-related disclosures. Further details are provided below.

Abbr.	TCFD	TNFD	TISFD
Full Form	Task Force on Climate-related Financial Disclosures	Taskforce on Nature-related Financial Disclosures	Taskforce on Inequality and Social-related Financial Disclosures
